

# **HARDWARE**

## **Assignment 2.1**

**1. Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').**

| <b>Device</b>    | <b>Type</b>         | <b>Real-life use case</b>           |
|------------------|---------------------|-------------------------------------|
| ➤ <b>Printer</b> | Inkjet Printer      | Printing college assignments        |
| ➤ <b>Printer</b> | Laser Printer       | Printing office documents           |
| ➤ <b>Printer</b> | 3D Printer          | Making small 3D models              |
| ➤ <b>Scanner</b> | Flatbed Scanner     | Scanning certificates and documents |
| ➤ <b>Scanner</b> | Handheld Scanner    | Scanning barcodes in a shop         |
| ➤ <b>Webcam</b>  | Built-in Webcam     | Attending online classes            |
| ➤ <b>Webcam</b>  | External USB Webcam | Video meetings on a desktop PC      |

## 2. Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

**3. List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage. Hint: Think about speed, convenience, and compatibility.**

| <b>Connection</b>  | <b>Advantage</b>                                                   | <b>Disadvantage</b>                     |
|--------------------|--------------------------------------------------------------------|-----------------------------------------|
| ➤ <b>USB</b>       | <b>Fast and works reliably</b>                                     | <b>You need a cable</b>                 |
| ➤ <b>Wi-Fi</b>     | <b>No cable is needed and you can connect from anywhere nearby</b> | <b>Needs a Wi-Fi network</b>            |
| ➤ <b>Bluetooth</b> | <b>Easy to connect without wires</b>                               | <b>Works only over a short distance</b> |

**4. Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.**

**❖ Device: Printer**

- **First, place the printer near your computer and connect it to the power supply.**
- **Turn on the printer by pressing the Power button.**
- **Take a USB (USB Type-B cable) cable and connect one end to the printer and the other end to the computer.**
- **Your computer should automatically detect the printer.**
- **If the computer asks for a driver or setup, follow the instructions on the screen.**
- **Go to Settings → Printers & scanners and check if your printer is showing there.**
- **Finally, print a test page to make sure everything is working correctly.**
