

Assignment 1

**Overview of Printers, Scanners
and Webcams**

1. Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

Device	Type	Real-life use case
➤ Printer	Inkjet Printer	Printing college assignments
➤ Printer	Laser Printer	Printing office documents
➤ Printer	3D Printer	Making small 3D models
➤ Scanner	Flatbed Scanner	Scanning certificates and documents
➤ Scanner	Handheld Scanner	Scanning barcodes in a shop
➤ Webcam	Built-in Webcam	Attending online classes
➤ Webcam	External USB Webcam	Video meetings on a desktop PC

2. Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

3. List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage. Hint: Think about speed, convenience, and compatibility.

Connection	Advantage	Disadvantage
➤ USB	Fast and works reliably	You need a cable
➤ Wi-Fi	No cable is needed and you can connect from anywhere nearby	Needs a Wi-Fi network
➤ Bluetooth	Easy to connect without wires	Works only over a short distance

4. Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.

❖ Device: Printer

- **First, place the printer near your computer and connect it to the power supply.**
- **Turn on the printer by pressing the Power button.**
- **Take a USB (USB Type-B cable) cable and connect one end to the printer and the other end to the computer.**
- **Your computer should automatically detect the printer.**
- **If the computer asks for a driver or setup, follow the instructions on the screen.**
- **Go to Settings → Printers & scanners and check if your printer is showing there.**
- **Finally, print a test page to make sure everything is working correctly.**
