

Assignment 5

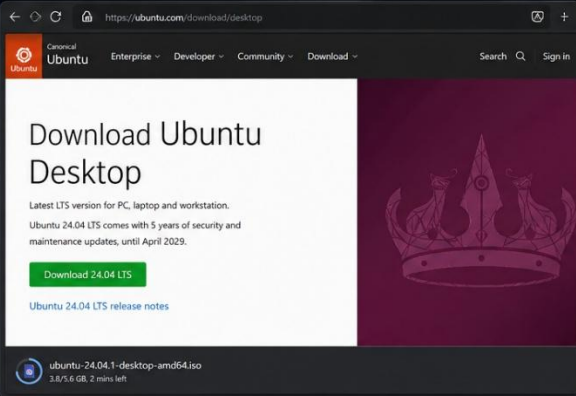

OS Installation & Configuration

1. On your Windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

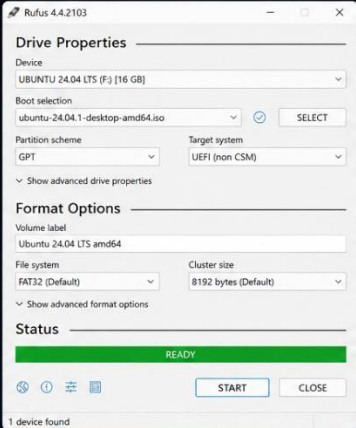

2. Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or Balena Etcher to create a bootable USB drive for installation. Hint: If you don't have a spare USB, use a virtual machine tool like VirtualBox to mount the ISO and start the installation process virtually.

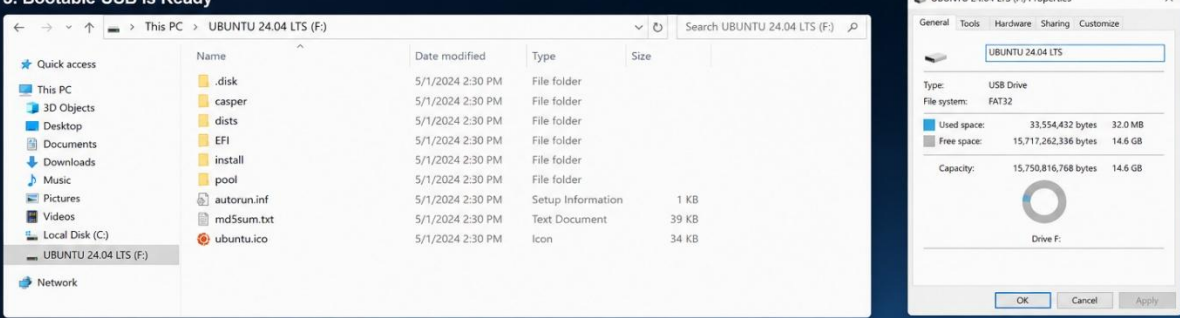

1. Download Ubuntu ISO

2. Create Bootable USB using Rufus

3. Bootable USB is Ready

Name	Date modified	Type	Size

3. On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati. Hint: Find 'Language & Region' in System Preferences to add or change languages.

➤ **Change the Desktop Wallpaper and Adjust the system Language in macOS.**

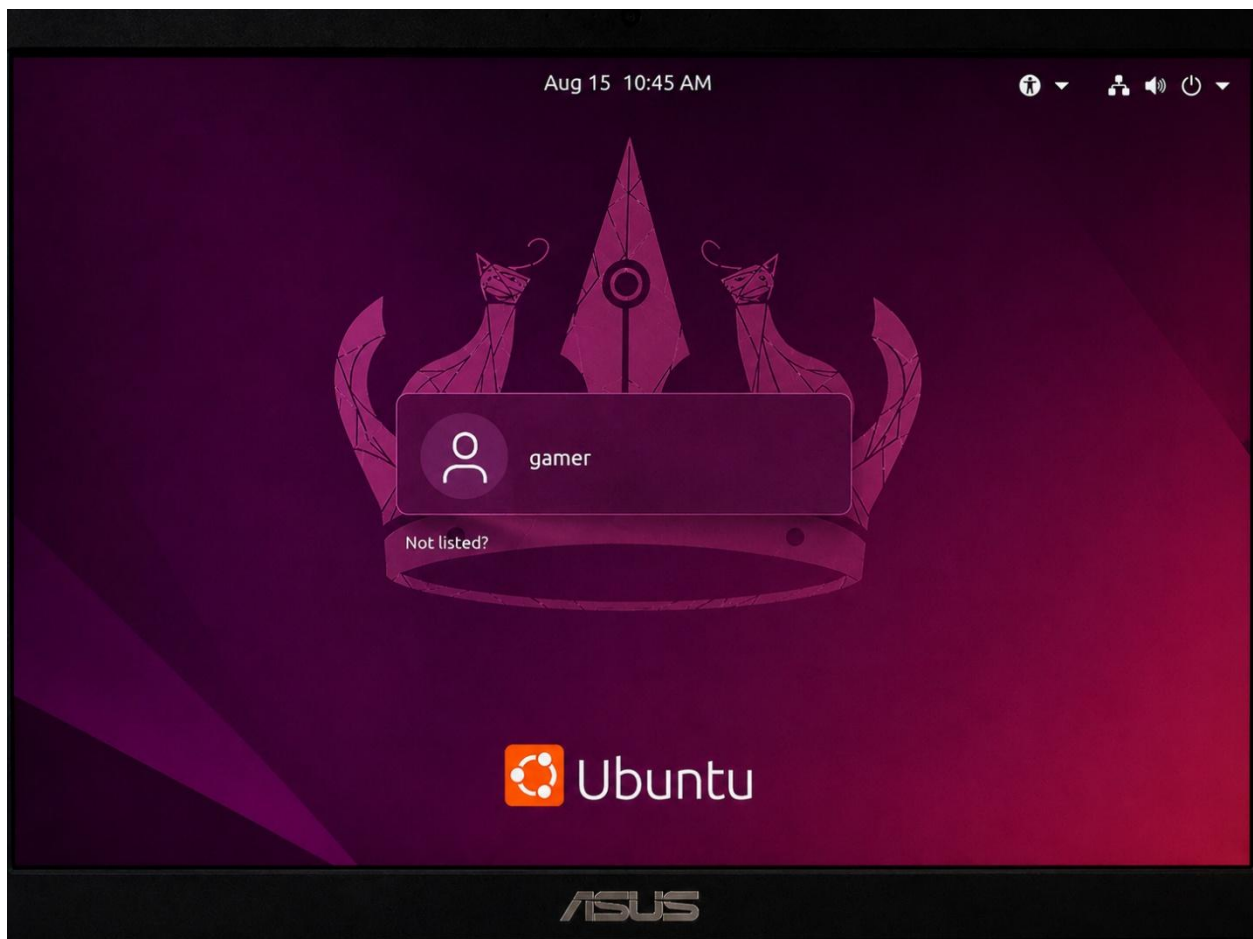

- **Wallpaper Configuration:**

- **Language Configuration:**

4. Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

5. Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing.

1. Preparing the Installation USB

✓ Download the official Windows 10 ISO and create a bootable USB using Rufus or Media Creation Tool. Make sure the USB has enough space.

2. Booting from USB

✓ Insert the USB and restart the laptop. Open the Boot Menu using a key like F12, Esc, or F9, then select the USB drive.

3. Starting Windows Setup

✓ Select the language, time format, and keyboard layout, then click “Install Now” to begin.

4. Selecting Installation Type

✓ Choose “Custom: Install Windows only (Advanced)” for a fresh installation. This allows you to select and manage the disk partitions.

5. Partitioning the Drive

✓ Back up important files before changing partitions. Select the correct partition for Windows and leave enough space for Windows, applications, and personal files.

6. Completing Installation

✓ Wait for Windows to install and restart the laptop. Then select the region, keyboard, network, and create a user account.

7. Privacy Settings

✓ Open Settings → Privacy and turn off unnecessary permissions such as location or advertising ID.

8. Windows Updates

✓ Go to Settings → Update & Security → Windows Update, check for updates, and install the available updates.
